## HEARING PREVENTION

· Children under 4 years of age at the arena ·

### OBJECTIVE

To protect the hearing of young children exposed to very noisy environments (concerts, sports games, shows).

### WHY IS THIS IMPORTANT?

Young children's hearing is very sensitive  
Noise levels in gyms can exceed 100 decibels  
Noise can cause irreversible damage even in a short period of time

### RISKS IN ARENAS/GYMS

Amplified music, crowd noise  
Announcements over the PA system  
Sudden sound effects (sirens, bass)

### CHOOSE A GOOD SPOT IN THE ARENA

Stay away from the speakers  
Opt for quieter areas (upper levels, far corners)  
Avoid the front rows

## ESSENTIAL PROTECTIVE MEASURES

- ✓ Use noise-canceling headphones designed for babies and children
- ✓ Make sure they fit properly and are worn at all times
- ✗ Do not use in-ear headphones
- ✗ Never expose children to noise without protection

## SIGNS OF DISCOMFORT TO WATCH FOR

Crying, restlessness  
Covering their ears  
Difficulty falling asleep after the event  
If these signs appear: move away from the noise immediately

## EXPOSURE TIME

Limit the amount of time spent in the arena  
Take regular breaks in a quiet place

## AFTER THE EVENT

Monitor the child's behavior  
Consult a professional if you have any concerns (unusual reactions, lack of response to sounds)
